DETAILED ACTION

Claims 1-6, 8, 10 & 11 are pending in the instant case; of which **Claims 1-6, 8 & 10** have been amended in a preliminary amendment. **Claim 10** has the wrong status identifier. **Claims 7 & 9** are canceled.

Information Disclosure Statement

Applicants' information disclosure statement (IDS), filed on 12/09/2005 has been considered. Please refer to Applicants' copy of the 1449 submitted herein.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1626

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over **Claims 1-5, 8 & 10** of copending Application No. **10/499,529**. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are drawn to overlapping subject matter. Specifically, there is overlap in the **'529** application when **X & Y** are phenyl or heteroaromatic moieties. Therefore, although the claims of the instant application are not identical to those of the **'529** Patent, there is overlapping compounds directed towards the same methods of therapy claimed.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In particular the term: "treating a patient suffering from a condition susceptible to amelioration by a Factor Xa inhibitor" is unclear. The compounds are shown to inhibit Factor Xa (see Assays on page 31 of specification); therefore, are useful for treating a disease, not a patient. Further, the list of diseases associated with Factor Xa is lengthy (see page 10, lines 4-22) and renders the metes and bounds of the claim, with respect to scope, indefinite. There are different patient populations for diseases such as thrombosis, Alzheimer's disease, stroke, diabetes, etc; so, it is unclear if the compounds are treating said diseases or just thrombosis.

Examiner suggests rewriting the claim to read: "A method of treating thrombosis comprising administering a therapeutically effective amount of a compound according to claim 1 or a pharmaceutically acceptable derivative thereof" in order to clarify the claim and put in condition for allowance.

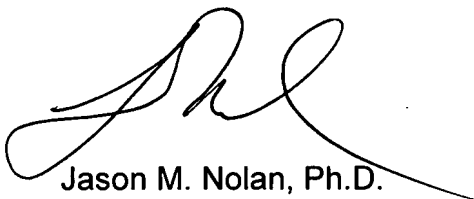

Claim Objections

Claim 10 is objected to because of the following informalities: the claim has an incorrect status identifier. Appropriate correction is required.
